

e-Den for dentistry

An interactive e-learning resource for dental trainees and practitioners

- Provides comprehensive coverage of the dental curriculum
- Features high-quality learning sessions with photos, animations and questions
- Produced by the Faculty of Dental Surgery of the Royal College of Surgeons of England and Health Education England e-Learning for Healthcare

e-Den equips you with the knowledge and skills needed to be a competent, caring dental practitioner. It features more than 300 interactive sessions covering the full dental curriculum.

Interactive features

The sessions are packed with photos, animations and videos on a variety of subjects such as patient assessment, periodontal disease, anxiety and pain control, and the restoration and replacement of teeth. Using these resources, you can build your experience in assessing, diagnosing and managing a wide variety of dental issues, as well as softer skills such as communication.

With self-assessment exercises, you can check your understanding of key concepts at the end of each session. You can also track your progress online and add the details to your training or continuing professional development (CPD) portfolio.

key features at a glance

- **Comprehensive resources**
e-Den features more than 300 learning sessions that cover all aspects of dentistry. Each session takes around 20 minutes to complete – so you can fit the e-learning around your busy study or work schedule.
- **Interactive content**
The learning content features images, animations and self-assessment exercises. This provides greater interaction and realism than textbook learning alone.
- **High-quality content**
e-Den gives you and other learners access to the same high-quality content – providing consistent resources for all. The clinical content has been written and peer-reviewed by leading dental specialists.
- **Flexible learning**
This e-learning is available anywhere, at any time, via the Internet. You can work through the modules at your own pace – focusing on subjects relevant to your specialty.
- **Professional accreditation**
e-Den meets the highest professional quality standards, as recognised by the Royal College of Surgeons of England. It is suitable for dental students or fully qualified dentists, hygienists, nurses and technicians.

In partnership with:

e-Den learning material has been written and edited by leading dental professionals who are highly experienced educators. The content is regularly updated to reflect the latest dental guidelines.

Enhanced learning outcomes

e-Den supports and enhances traditional classroom learning. You can build your theoretical knowledge before lectures or practical work, so you'll be better prepared and informed for teaching sessions. This delivers improved learning outcomes and helps to make the best use of teaching resources.

You can tailor the learning to your particular specialty or areas that need

further study. *e-Den* also offers an excellent refresher on core themes and a helpful exam revision aid.

Professional development

This quality-assured e-learning tool is ideal for dental training and also for continuing professional development (CPD). Evidence of course completion contributes CPD points for revalidation purposes.

Furthermore, *e-Den* supports study for postgraduate examinations, including MJDF (Membership of the Joint Dental Faculties) and MFDS (Membership of the Faculty of Dental Surgery).

Learning at your pace

e-Den is available anywhere, at any time via the Internet. So, you can study in the workplace, at home or even on the move.

e-Den provides an engaging, interactive learning resource that fits around your busy life.

PURCHASE NOW

“e-Den delivers better informed, better trained dentists, which ultimately leads to improved patient care.”

Fatima Bulbulia, Faculty of Dental Surgery, Royal College of Surgeons of England
