No matter how imaginative your project...

Our expertise, your imagination...

STAGE TECHNOLOGIES captures the spirit of innovation, pioneering creative solutions. Since 1994, our engineering expertise has enabled you to take control of your creative vision. However big or small your needs, our specialist teams use their extensive knowledge to create technical solutions that will surpass your expectations.

No matter how imaginative your project, no matter where you are in the world, our global presence enables our experts to bring their inspiration and creativity to your dream.

From the conception of the idea to the final curtain, Stage Technologies takes ownership of the challenge. Our proven expertise, knowledge and personnel guarantee a world-class service for all your performance projects.

Flexibility and ingenuity ensure that...

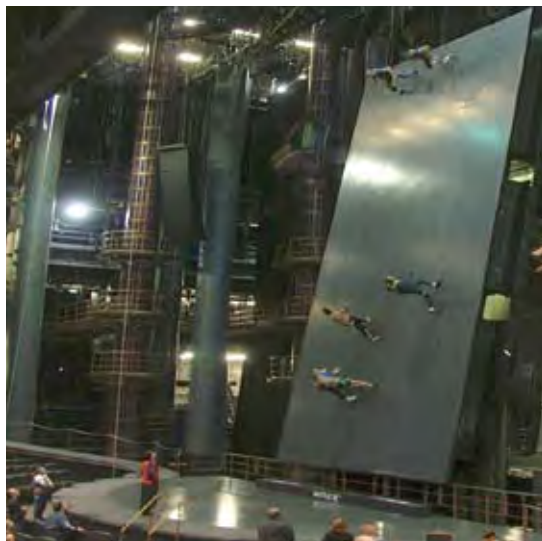

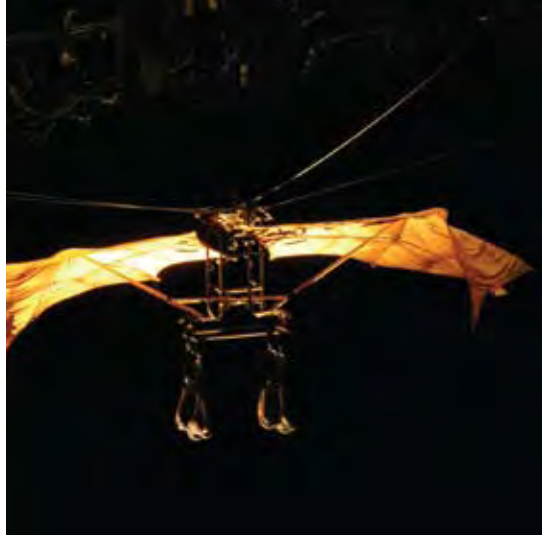

Creative Innovation

A design revolution in entertainment has increased the demand for ever more sophisticated technical effects. Stage Technologies has risen to this challenge. By using our unique blend of mechanical, electrical, electronic and software engineering, our award winning off-the-shelf product range, bespoke design and rental service have become the generic solution for many projects.

Our ongoing in-house research, design and development ensure that Stage Technologies remains the market leader for all your automation and engineering requirements.

Our flexibility and ingenuity ensure that you always receive a quality service no matter what your requirements. Whether it is working to tight timescales, fitting design solutions into compact areas or combining sales and rental packages, we can accommodate all your needs.

Engineering Solutions

Utilising our breadth of engineering skills, we have developed a wide range of flexible control and mechanical equipment for theatre and live entertainment applications.

Anything is possible; from power flying and under-stage solutions to more complex applications such as performer flying. We can also provide products for 3D applications which may be used on their own or incorporated as part of a standard system.

Whatever the size of your project, from large turnkey installations to rental equipment for one-off events, our experts from all spheres of engineering have developed products and solutions to meet your needs.

From system design to standard winches, from electrical systems to project management home and abroad, Stage Technologies support your artistic vision from brainchild to stage spectacular.

Mixing creative engineering expertise...

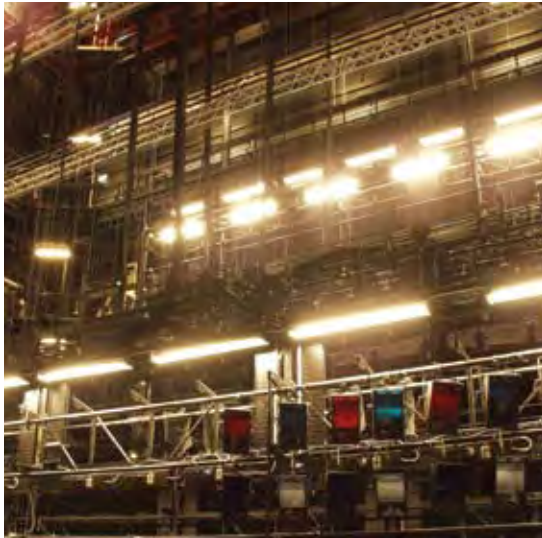

Our Proven Expertise

Stage Technologies is driven by a team of over 100 engineers and support staff. Their specialist skills and expertise provide versatile, quality solutions for live performance and entertainment applications.

Many of our experts have an extensive background in the arts and entertainment world and therefore understand the complex dynamics backstage and are sympathetic to the needs of the production.

Mixing creative knowledge and engineering expertise with empathy and support, our innovative approach translates your vision into a world-class performance. It is this fusion of technical and artistic disciplines that are essential for an aesthetically spectacular show that opens on time and on budget.

All Stage Technologies personnel work to quality standard ISO 9001:2000

No matter where you are in the world...

Global Presence

Stage Technologies originated in London's West End in 1994. Today we offer our clients a global service with a presence that includes London, the USA, Australia, Italy, Hong Kong and Macau resulting in a worldwide network of training and support engineers.

This unique insight into different cultures and working practices provides us with the opportunity of incorporating many examples of best practice within our products and solutions.

Our global presence enables our expert team of engineers to work with you every step of the way. Our comprehensive training courses are designed to ensure that your system technicians learn good programming and service techniques. Through our instruction they will fully understand the automation philosophy, the system architecture and its component parts.

...we bring creativity to your vision

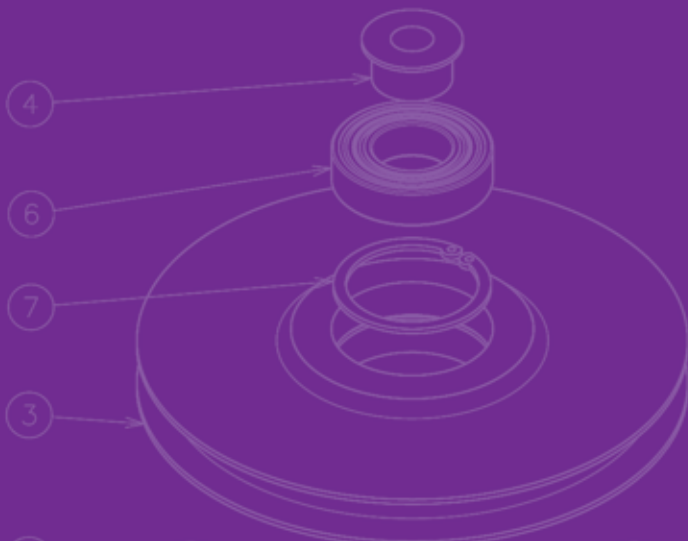

Taking ownership of your challenge...

World-Class Service

The end of your production does not mean the end of your relationship with Stage Technologies. Whether you require programming assistance or support training to get the most from your staff, our experts can help.

Our market leading support package maximises the value of our products. It reduces the total cost of ownership in the long term by incorporating regular site visits and maintenance schedules, full event logging, telephone/email and advanced online support.

By taking ownership of your challenge, our expert engineers are with you every step of the way. From the initial concept to the final performance, they will be there 24/7 to offer support and assistance whenever and wherever you need it.

...and with you every step of the way

Offering a global response for clients...
