

**We'll do the number-crunching, so you can focus on building your empire**

Our accounting services free up time for sole traders and small business owners to focus on the activities that help their ventures grow.

Running a business is demanding. First, you've got opportunities to pursue and new products to launch. And then you realize your tax return is due in a few days time. Consequently, rather than following up exciting new leads, you dig out a crumpled pile of receipts and spend hours sorting them into a cumbersome spreadsheet. At this point you'll probably also pledge that next year will be different.

How? Move to Cloud-based accounting and automate the financial tasks to GroStrategy. Then you can focus your time on the activities that make a real difference to your business.

**Cloud accountants for forward-thinking small businesses**

Accountancy for small businesses is usually limited to tax returns and other basic things. First of all, we do all of this, but there's more to GroStrategy than organising returns and recording accounts.

**Online-accounting is changing everything**

Using software and apps that deliver cost and time efficiencies, we help clients to manage their transactions and expenses online, starting from the very administration manual bookkeeping processes. As a result, this creates more time for us to focus on adding real value to your business.

**Our founder**

Kulbir Penezer, CEO and chartered accountant

Kulbir is a chartered accountant with more than 16 years' experience. During this time, he's worked with listed companies, utility businesses, and investment and retail banks. While providing strategic support to multi-million pound functions, he recognised an opportunity to create a bespoke accountancy service for small businesses. GroStrategy is the result.

Kulbir builds a close rapport with business owners. As a result, he understands the challenges and aspirations
